About WWJD

World Wide Joint Discoverers (WWJD) is a Malawian drone technology business specialising in aerial surveillance, security, monitoring, and emergency response, founded in 2019 and headquartered in Mzuzu. The company began with personal investment, later supported by grants from the Mzuzu E-Hub and USAID, and has grown into a registered sole proprietorship and a licensed Class B Electrical Contractor under the Malawi Energy Regulatory Authority (MERA).

CEO's Statement

“

The name World Wide Joint Discoverers is inspired by a shared journey; uniting people to create one great product, while also developing emerging talent to help solve local challenges. It also reflects a philosophy of our core founding values: unity, integrity, purpose-driven innovation, and service to the community.

These principles guide how we work; from how our teams are trained to how we build trust and manage long-term relationships with our clients and partners.”

”

Surveillance is the business that built WWJD's reputation, generates the bulk of its revenue, and anchors its operational workforce. Everything else WWJD does exists to support and strengthen that core.

About WWJD Cont..

Founded - 2019

Headquarters - ZANAK Building, 3rd floor, Room #32, Mzuzu, Malawi

Legal Status - Sole Proprietorship, registered in Malawi

Registration - RPL: CAA/CPA

Chief Executive Officer - Chikondi Chiumia

Core Business - Drone Surveillance & Security

Supporting Business Lines - Eco-Tourism, Electrical Contracting,
Agricultural Drone Services

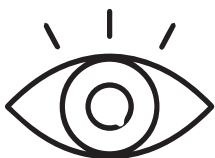

Company

Mission & Vision

Our Mission

WWJD's mission is to harness the power of advanced drone technology to revolutionize surveillance, tourism, and energy sectors by providing cutting-edge solutions that enhance safety, efficiency, and sustainability. Through real-time monitoring, precise mapping, and rapid emergency response, WWJD creates safer environments, promotes responsible tourism, and optimizes energy system management contributing to community well-being and technology-driven development.

Our Vision

The company's vision is to be a leading innovator and provider of cutting-edge solutions that drive global progress and inspire transformative change. Within Malawi and the broader region, WWJD aspires to be the first name clients think of when they need drone technology applied to complex, real-world challenges.

Our Core Values

-  Integrity and accountability in all actions
-  Commitment to innovation and excellence
-  Building stronger partnerships
-  Respect for stakeholders and diversity
-  Promotion of ethical and sustainable practices
-  Equal opportunities for all
-  Professionalism and continuous improvement

Our Core Business: Drone Surveillance & Security

WWJD deploys advanced drone technology to give clients real-time aerial surveillance, monitoring, and emergency response support. Our surveillance operations cover Malawi's agricultural, industrial, and energy sectors and are built around a simple principle: clients need to see what is happening on their sites, as it happens, and trust that the people watching it for them are trained, licensed and reliable.

This is not a side service for us. It is the business WWJD was built to do well and it is where we have put the greatest investment in people, equipment and systems.

Track Record

A live partnership with Illovo Malawi, generating substantial annual revenue from drone surveillance at the Nchalo and Dwangwa sites.

A confirmed, field-deployed pilot workforce currently operating across multiple client sites.

A first Board Management Meeting held in January 2026, formalizing governance oversight of the company's growth and operations.

A comprehensive HR and Operations infrastructure, built specifically to support a professional surveillance workforce.

136,000+

**Hours of
Flight Time**

Our drone pilot team has logged over 136,000 hours of flight time

8,700+

**Potential
Threats Detected**

Our drone pilot team has intercepted more than 8,700 intruders

131+

**Successfully
Supported
Containment**

Our drone pilot team has Facilitated 131 arrests

2306+

**Stolen products
retrieved**

Our drone pilot team has Recovered 2,306 bundles of sugarcane

Outcomes that have delivered measurable financial savings for our client, Illovo Malawi.

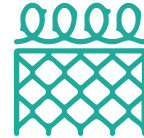

This track record is the foundation the company is building on as it pursues new surveillance and security contracts across the agricultural, industrial, energy, and government sectors

Services We Offer

Real-Time Aerial Surveillance

Continuous or scheduled drone monitoring of client sites, with live feeds and rapid alerting for anything that requires attention.

Security & Perimeter Monitoring

Aerial coverage of site boundaries and high-value assets, supporting the detection of unauthorized access, theft and other security incidents before they escalate.

Emergency Response Support

Rapid aerial deployment to support emergency situations on client sites, giving decision-makers a clear picture of a situation as it develops.

Industrial & Energy Site Monitoring

Drone-based inspection and monitoring of energy and industrial infrastructure, carried out under our MERA Class B Electrical Contractor registration.

Agricultural Surveillance & Mapping

Crop monitoring and field mapping services that apply the same pilot expertise and equipment used in our core surveillance operations to the farming sector.

Technical Capability & Fleet

WWJD maintains a working drone fleet supported by a scheduled preventive maintenance program and a stock of critical spare parts, so that fleet downtime does not compromise client coverage. The company tracks fleet availability, mission completion rates and operational response times as standard practice, not as an aspiration.

As surveillance contracts grow, **WWJD** is investing in expanded monitoring capability, including mapping and GIS tools and thermal imaging, with technology adoption gated to confirmed client need, pilot training readiness and Board-approved budget rather than added for its own sake.

Regulatory

Compliance & Licensing

WWJD operates within Malawi's aviation and energy regulatory frameworks and treats compliance as a condition of doing the work well, not paperwork to get through.

- ✓ All active pilots hold current Remote Pilot Licenses (RPL) issued by the Department of Civil Aviation (DCA), with refresher training and renewals coordinated on an ongoing basis.
- ✓ WWJD is registered with the Malawi Energy Regulatory Authority (MERA) as a Class B Electrical Contractor, permitting drone-assisted inspection of energy infrastructure.
- ✓ The company maintains a proactive relationship with the DCA and monitors regulatory developments that could affect surveillance operations.

Safety & Quality Standards

WWJD's surveillance clients are trusting us with sensitive sites and sensitive information and that trust is protected through consistent safety and quality practice including:

- ✓ Full DCA license compliance for all active pilots, verified on an ongoing basis.
- ✓ A PPE policy applied across all field and site operations.
- ✓ Quarterly PPE compliance audits, with a target of at least 95 percent compliance.
- ✓ Defined emergency response protocols for all active surveillance sites, including annual dry-run drills.
- ✓ Client satisfaction tracked through a formal annual survey, with a target rating of 4.0 out of 5.0 or above.

Leadership & Team

WWJD is led by Chief Executive Officer Chikondi Chiumia, supported by HR & Chief Operations Officer Evelyn Twambilire Kapira who oversee day-to-day people and operations management. The company reports to a Board chaired by Hussein Latif, with members Dr. Emily Grace Mwale, Gift Banda, and Counsel Aaron Gausi, who provide governance oversight and strategic direction.

On the ground, surveillance operations are led by Chief Pilot Yamikani Nyoni, supported by a growing team of senior and junior drone pilots deployed across active client sites. This structure keeps decision-making close to the field while ensuring the company's governance and administration keep pace with its growth.

Why Clients Work With WWJD

- ✓ A proven, revenue generating surveillance contract already in place, not a concept awaiting its first client.
- ✓ A field-deployed, DCA-licensed pilot workforce with real operational experience across multiple sites.
- ✓ Dual registration as a drone operator and a MERA Class B Electrical Contractor, giving WWJD a technical range most drone operators in the region do not have.
- ✓ A governance structure, with an active Board and a legal advisor, that gives clients confidence they are dealing with a properly run company.
- ✓ A founding commitment to integrity and community impact that shapes how the company treats its clients, its staff, and the areas it operates in.

Supporting Business Lines

While surveillance and security remain **WWJD's** core business, the company operates three complementary lines that strengthen its financial base and extend its drone expertise into new sectors:

- ✓ Eco-Tourism at Usisya, NkhataBay offering drone footage, boat transport, watersports, camping, and guided cultural experiences.
- ✓ Electrical Contracting using drone assisted inspection and monitoring of energy infrastructure under MERA Class B standards.
- ✓ Agricultural Drone Services handling crop monitoring and field mapping for the farming sector.

Separate profiles are available for each of these business lines on request, tailored to their own clients and audiences.
